Note on proprietary status

This dictionary includes words which have, or are asserted to have, proprietary status as trade marks or otherwise. Their inclusion does not imply that they have acquired for legal purposes a non-proprietary or general significance, nor any other judgement concerning their legal status. In cases where the editorial staff have some evidence that a word has proprietary status this is indicated in the entry for that word, but no judgement concerning the legal status of such words is made or implied thereby.
